Daniel Hatley

Daniel Hatley is a Chartered Building Professional and Chartered Engineering Associate (Construction), with extensive experience in construction, project management and contract administration across government, commercial, mining, residential and community infrastructure projects in Western Australia.

Daniel has led and contributed to the successful delivery of significant regional projects, including the $28.5 million Geraldton Aboriginal Short Stay Project and major refurbishment works across the Pilbara and Mid West. His professional experience encompasses project delivery, procurement, financial management, risk mitigation, stakeholder engagement and coordinating multidisciplinary teams to achieve successful outcomes.

Daniel holds Graduate Diplomas in Engineering and Portfolio Management, alongside qualifications in project management, program management, OHS and building and construction. He is a member of the Australian Institute of Building and is a registered building practitioner in Western Australia.

Through his professional work and community involvement, Daniel is committed to supporting regional communities and contributing to projects that preserve and strengthen the character of the Mid West. He brings to Monsignor Hawes Heritage Inc. practical knowledge of building conservation and construction, together with an appreciation of the importance of protecting the region’s architectural, cultural and spiritual heritage for future generations.
